

Thor Steel Services

THOR Steel Services is a locally owned steel service centre. We have been servicing the needs of our customers since 2003. We have developed a reputation for precision sawing and cutting at the fairest price around. For those of you who already know us we thank you for your business and look forward to expanding our relationship. If you haven't met us yet, please take a minute to look through our brochure or website (www.thorsteelservice.com) and consider us the next time you have metal or sawing needs. We are confident that we can deliver what you need, when you need it and at an attractive price.

Quality On-Site Sawing

Thor Steel Services offers the versatility of both precision and production sawing on site. We provide our professional machine operators with state-of-the-art equipment (Kasto) and training to ensure the highest quality work available. Your pre-production parts will be ready ahead of the competition and guaranteed to meet your specifications. Thor Steel Service breaks completely new ground in band sawing technology.

Quality On-Site Cutting

The most advanced technology in equipment management, combined with the use of high level software, guarantees the development applied to the equipment. Our cutting machine is managed automatically and monitors the cutting process. The plasma technology is used to cut ferrous alloys with middle to low thickness. As it is an electric arc, the plasma is able to cut all the electrically conductive materials. During the cutting process, it can be used with compressed air or gas mixture, depending on the materials to be cut and the quality required. The machine we are operating is a combined plasma and oxy technology in a single machine.

Block Band Saw

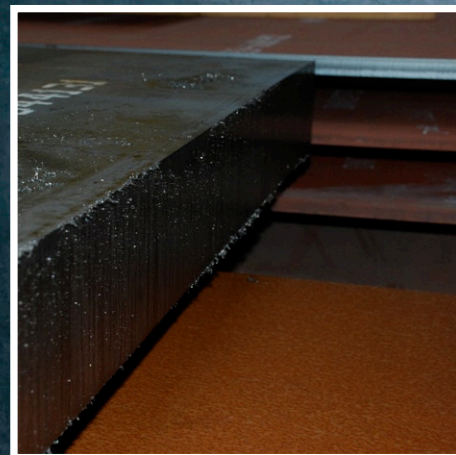

- Kasto BBS A3x20
- Designed for sawing steel plates 2000*7000 mm

Technical specification

- Sawing height up to 360 mm
- Sawing length up to 7000 mm
- Sawing width up to 2060 mm

Sawing capacity /speed

- Depending on height/steelgrade 10 – 38 mm/min

Plasma/Oxy Cutting Machine

- Plasma unit: Hypotherm Hpr260 High Performance plasma
- System: 260 Amp
- Gasflame unit
- Designed for cutting steel plates 12000*3000 mm
- Built on a Soitaab Lineacord PCL40

Technical specification:

- Cutting height: Plasma: up to 40 mm
- Cutting length: up to 12000 mm
- Gasflame: up to 160 mm
- Cutting width: up to 3000 mm
